

Western Air Maps FTP Server

It is recommended that an ftp specific browser is used rather than a typical web browser when the transfer includes many files or downloads larger than 100 mb.

Here is a link to a free and easy to use FTP browser.

EFTP – Simple and free to use FTP browser

<http://www.snapfiles.com/get/eftp.html>

Different FTP download options are available here:

<http://www.snapfiles.com/downloadfind.php?st=ftp&action=s&search=Find+it&lc=1>

The Western Air Maps FTP address is:

<ftp://mail.westernair.com>

The User Name for your company is:

MAPPS_NOAA

The Password for your company is:

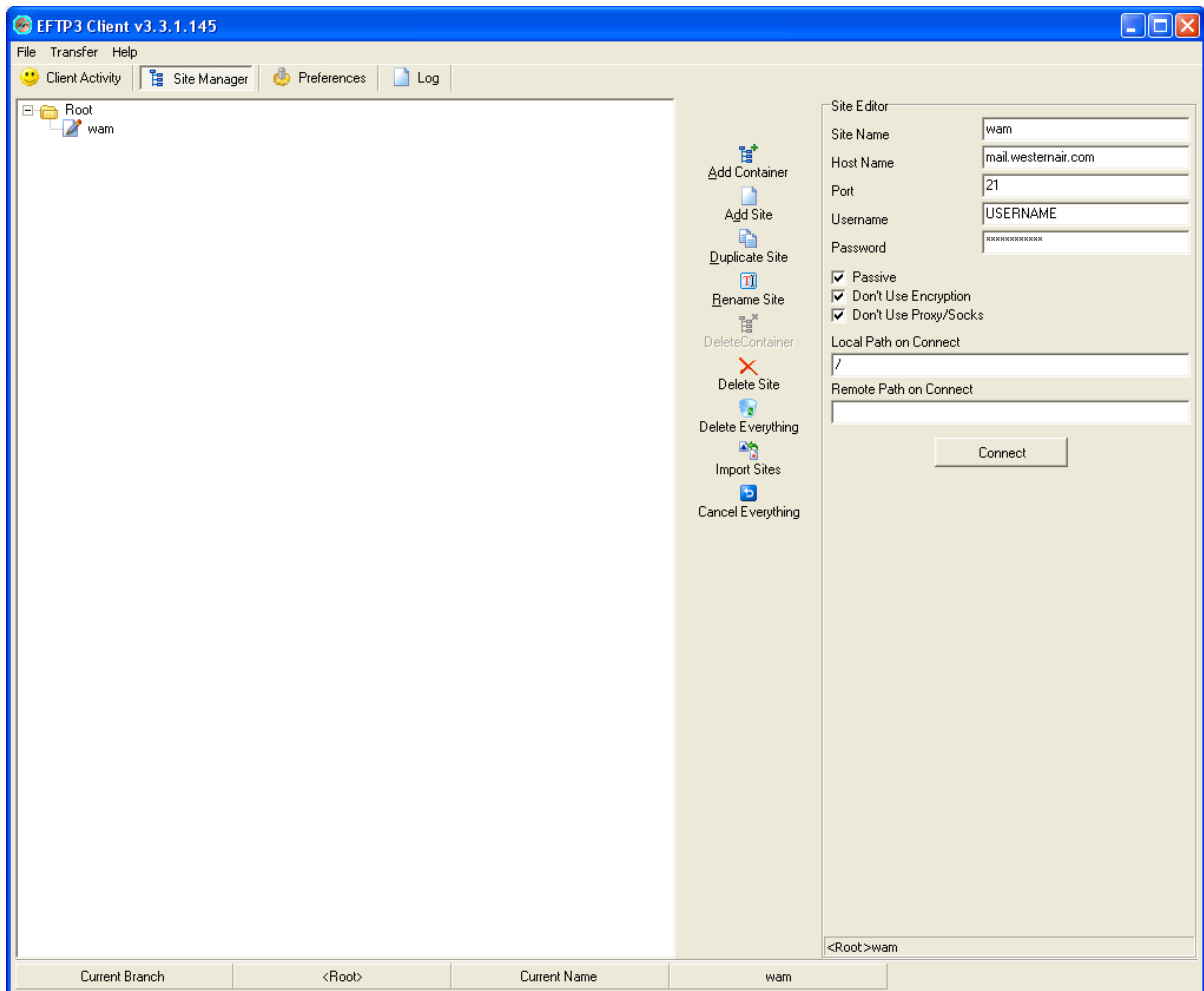

COMMITTEE

Please download files from the “Outgoing” folder and upload files to the “Incoming” folder.

The Use of EFTP

Download and install.

Open and Go to the Site Manager Tab.

Enter the site name: WAM

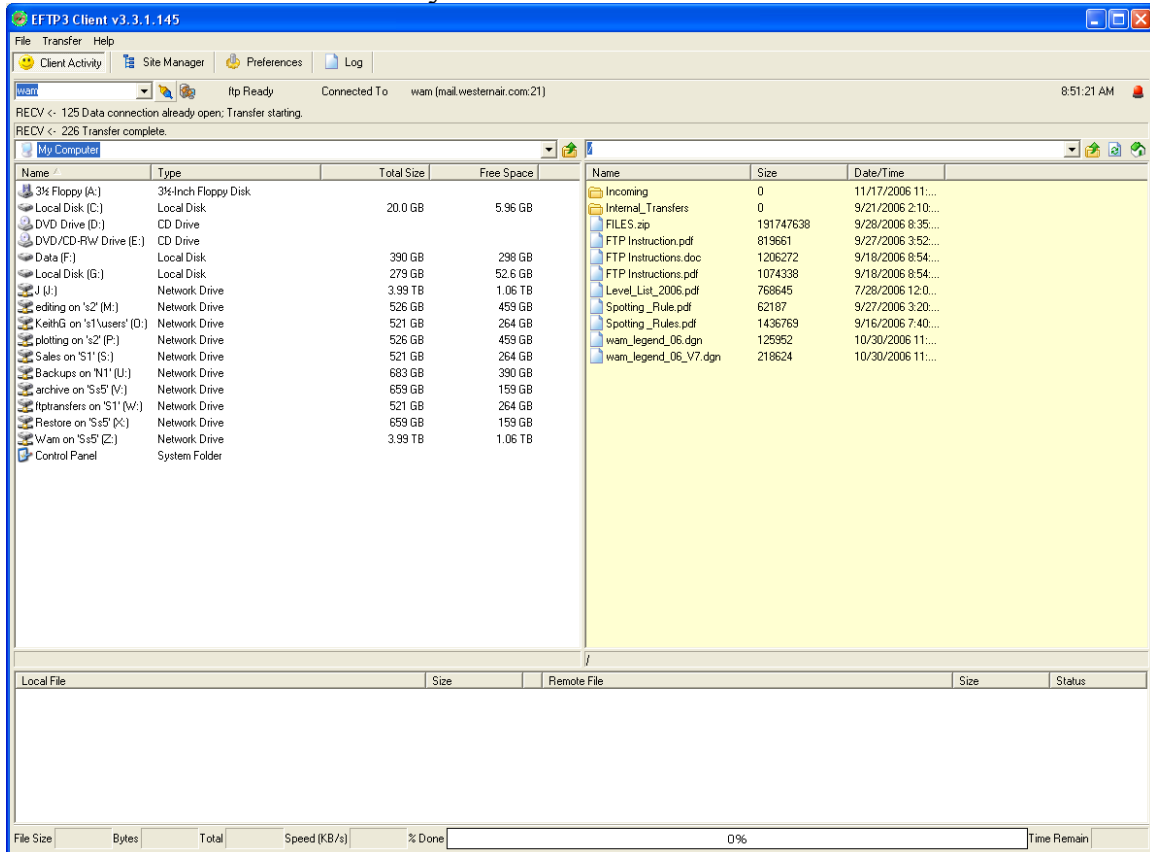

Host Name: mail.westernair.com

Username: Your Username from page 1

Password: Your Password from Page 1

Leave all other options to default settings.

Go back to the Client activity tab.

The left side is your local machine.

The right side is the WAM FTP server.

You may drag and drop files to the folders of your choice between the two machines. You will notice that the bottom window (the Queue) will contain files. When you have the queue how you'd like it press the "start processing the queue" button (just below the site manager tab).

The download or upload will commence.
